PRODUCT DATA SHEET

ALUMINUM COMPLEX GREASE

Description:

Aluminum Complex Grease is high performance, smooth homogeneous buttery grease formulated with highly refined petroleum oil and fortified with performance additives.

Key Features :

- ⇒ High Drop Point
- ⇒ Good oxidation stability even at high temperature
- ⇒ Temperature reversibility
- ⇒ Good protection against rust and corrosion
- ⇒ Good pumpability and suitable in centralized lubrication system

Applications:

Aluminum complex grease is recommended for lubrication of bearings operating at high temperatures. The grease is very popular in steel plants where centralized systems are common. It can also be used in cement plants, power plants and other industrial applications.

TYPICAL DATA

Tests	Test Method	Data
NLGI GRADE	-	2
Appearance	Visual	Smooth and buttery
Color	Visual	Brown
Penetration, 60 strokes	ASTM D-217	265-295
Drop Point, deg C	ASTM D-2265	260
Copper strip corrosion,rating	ASTM D-4048	1b
Four Ball weld load, Kg.	ASTM D-2596	315
Water washout test,% loss	ASTM D-1264	3.5

Health and Safety:

Based on the information available, this product is not likely to pose any adverse effects on health provided it is used as per the recommendation. For more information refer MSDS. For disposal, check local regulations and take care to protect the environment.

The data and information in this is based on our general experience and knowledge. It is given to reader for possible applications. It is the responsibility of the user to use the product safely
