OILS & SPECIALITIES

PRODUCT DATA SHEET

CALCIUM COMPLEX GREASE

Description:

Calcium Complex Grease is high performance, smooth, homogeneous greases formulated with highly refined petroleum oil and fortified with performance additives.

Key Features :

- ⇒ High water resistance & give excellent service in applications where water ingress is unavoidable.
- ⇒ High load carrying ability
- ⇒ Protection against rust and corrosion

Applications:

Calcium complex grease is recommended for lubrication of antifriction bearings operating at high temperatures and where water ingress is possible. It is popular in steel plants and other industrial applications.

TYPICAL DATA

Tests	Test Method	Data
NLGI GRADE	-	2
Appearance	Visual	Smooth & homogeneous
Color	Visual	Light brown
Penetration, 60 strokes	ASTM D-217	265-295
Drop Point, deg C	ASTM D-2265	260
Copper strip corrosion	ASTM D-4048	1b
Four Ball weld load, Kg.	ASTM D-2596	250
Water washout test,% loss	ASTM D-1264	5

Health and Safety:

Based on the information available, this product is not likely to pose any adverse effects on health provided it is used as per the recommendation. For more information refer MSDS. For disposal, check local regulations and take care to protect the environment.

The data and information in this is based on our general experience and knowledge. It is given to reader for possible applications. It is the responsibility of the user to use the product safely
